

Sebastian “Alex” Lanz

sebastianlanz301@gmail.com | 281.714.8856 | <https://mr-neptune.dev>

SKILLS

Programming: C, C++, C#, Java, JavaScript, TypeScript, Python, HTML/CSS, SQL, Lua and R

Engines and Frameworks: ReactJS, Express.js, Next.js, Godot, Unreal Engine and Unity

Software: Git, GitHub, Visual Studio, Visual Studio Code, MongoDB, MySQL, Jira, Figma, Microsoft Office Suite, and Google Workspace

Other: Project Management, Scrum, Spanish Language (Conversational), Japanese Language (Beginner)

WORK EXPERIENCE

LOUNIS TATA SOFTWARE ENGINEER (Jan 2020 - Feb 2020)

- Mobile Applications Development Intern: Assisted in development of mobile applications using Linux platform and C++.

ROVOP (Jun 2019 - Jul 2019)

- Summer Intern: Trained on remote operated vehicle simulator; assisted engineers in trouble shooting hardware; reviewed contracts and prepared power points and presentations for meetings.

WORCESTER POLYTECHNIC INSTITUTE (Aug 2022 – May 2026)

- **Tables4U** (Oct 2024- Jan 2025)
Front-end and back-end Developer: Developed a management web application for restaurants to use when managing reservations using Typescript, JavaScript, ReactJS and MySQL. Deployed using AWS.
- **TrailBlazer** (Jan 2024 - Mar 2024)
Front-end and back-end Developer: Developed a pathfinding web application for hiking trails using a MERN stack, TypeScript, Bootstrap, and Auth0. Deployed using AWS.
- **Dragonfly** (Jan 2024 - Mar 2024)
Solo Programmer: Developed a custom version of the Dragonfly game engine using C++ and SFML. Created two different 2D arcade games to showcase the engine.
- **Project Unwarming** (Oct 2025 - Jan 2026)
AI and Systems Programmer: Developed an educational game that has users compete against an AI in an energy industry management simulation to teach users about global warming and renewable energy using Python and Pygame.
- **Teaching Assistant** (Mar 2026 – May 2026)
Peer Learning Assistant: Assisted an instructor in an undergraduate interactive media course. Assisted students with project management and technical support.

INDEPENDENT DEVELOPER (Aug 2022 - present)

- **C(ai)ndy.Land** (Aug 2025 - Sep 2025)
Proc gen Algorithm Developer: Developed a web application that procedurally generates boards and customizable rulesets, which can then be printed and physically played on. Created using JavaScript, WebGL, and Svelte. Deployed using Netlify.
-

EDUCATION & HONORS

Worcester Polytechnic Institute - Double Major (BS) of Computer Science and Interactive Media and Game Development (Graduated May 2026 with High Distinction)

- GPA: 3.90
 - WPI Dean's List (Fall 2022 - Fall 2025)
 - Placed in the top ten students in the WPI Software Engineering class (Fall 2024)
 - WPI Presidential Scholarship Recipient (Aug 2022 - present)
 - WPI Senior Capstone Project Award Winner (May 2026)
-

ACTIVITIES AND INVOLVEMENT

- Participant in Over Ten Different Game Jams and Hackathons (Aug 2022 - present)
- International Game Developer Association WPI Chapter Member (Jan 2023 – May 2026)
- WPI Video Game Club Treasurer (Jan 2024 - Jan 2026)
- WPI IMGD Branding and Advertising Project (Sep 2024 - Dec 2024)
- London Museum Interactive Exhibit Research - WPI Global Projects Program (May 2025 - Jul 2025)
- PAX East WPI Booth Volunteer (Mar 2024, May 2025, Mar 2026)
- PAX East Project Presenter and WPI Representative (Mar 2026)
- WPI Interactive Media and Game Development Undergraduate Mentor (Oct 2025 – May 2026)
